Course Information

This free human behavior course will give you a clear understanding of cognitive processes and patterns of human interactions. Diploma in Human Behavior will teach you about the science of human behavior and basic and advanced psychological processes. You will first learn about the schools of psychology, contemporary psychological perspectives of human behavior, and the ethics of psychological research.

Next, you will be introduced to the basic psychological processes in human behavior. You will study the mechanism of the sensory system and the signal detection theory. The course discusses the processes of perception and models of the recognition network. Then, you will study the advanced psychological processes which involve the principles of learning and conditioning and the types of human memory. You will also analyze the development of language and human thought processes. Finally, you will discuss the processes of intelligence, emotion, personality, social influence, and social cognition.

By taking this free online course from Alison, you will gain in-depth knowledge of the factors affecting human behavioral patterns and techniques for managing behavioral issues. This detailed course is ideal for students, researchers, health professionals, and anyone with an interest in mental processes and human interactions. Check out this course today, and improve your knowledge of human cognitive levels in no time.
